DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "adjustable " strap must be shown (claim 6) or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Shavitz (5,697,671).

Shavitz teaches every claimed feature of claim 1-5, 8-9 including a source of vibration (the engine) connected to a frame 26, a first seat 14, a secondary pelvic support 30. As for claim 9, note that Shavitz teaches every claimed step including the step of positioning, starting, allowing, straddling.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shavitz (5,697,671) in view of Smithea (3,940,166) .

Smithea teaches a motorcycle seat with strap 15 removably connected to a secondary pelvic support. In view of the teaching of Smithea (3,940,166), it would

Art Unit: 3764

have been obvious to one ordinary skill in the art at the time the invention was made to provide the secondary pelvic support of Shavitz with a removable strap in order to remove the strap when not needed.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shavitz (5,697,671) in view of Hoffacker et al (4,218,090).

Hoffacker teaches a bicycle seat 20 made of plastic. In view of the teaching of Hoffacker et al, it would have been obvious to one ordinary skill in the art at the time the invention was made to a use plastic material for the secondary pelvic support of Shavitz to provide the desired degree of support to a user.
